Plant Science, 72 (1990) 289—292
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 72 (1990)

Abscisic acid, alfalfa, embryo maturation, *Medicago sativa*, somatic embryogenesis, 93
Acclimatization, soybean tissue culture, explant, organogenesis, plant regeneration, in vitro flowering, 101
Agarose bead method, *Festuca arundinacea*, plant regeneration, protoplast, single genotype, nurse culture, 125
Agricultural insect pests, α-amylase inhibitors, *Hordeum* (endosperm), specificity (enzyme inhibition), *Triticum* (endosperm), 37
Agrobacterium tumefaciens, transformation of wheat, pollen transfer, flavonol glycosides, 233
Agrostis alba, embryogenic suspension, protoplast culture, amino acids, plant regeneration, 267
Alfalfa, abscisic acid, embryo maturation, *Medicago sativa*, somatic embryogenesis, 93
Amino acids, *Agrostis alba*, embryogenic suspension, protoplast culture, plant regeneration, 267
α-Amylase inhibitors, agricultural insect pests, *Hordeum* (endosperm), specificity (enzyme inhibition), *Triticum* (endosperm), 37
Anionic, guar, purification, *Cyamopsis tetragonolobus*, α-galactosidase, germination, 173
Anther culture, *Solanum carolinense*, pollen androgenesis, calcium, auxin, ethylene, 109
Antisense RNA, *cat* reporter gene, electroporation, gene regulation, promoter occlusion, tobacco protoplasts, 69
Autolysis, *Cicer arientinum*, epicotyls, β-galactosidase, glucosidases, growth, 45
Auxin, indoleacetic acid, binding, *Cicer arietinum*, 151
Auxin, *Solanum carolinense*, anther culture, pollen androgenesis, calcium, ethylene, 109

Barley, chloroplast DNA, gene expression, NADH dehydrogenase, senescence, 63
Binding, auxin, indoleacetic acid, *Cicer arietinum*, 151
Brassica juncea, transformation, transgenic plants, 245

Calcium, *Solanum carolinense*, anther culture, pollen androgenesis, auxin, ethylene, 109
Catalase, hydrogen peroxide, NADPH, potato, *Solanum tuberosum*, 19
Cat reporter gene, electroporation, gene regulation, promoter occlusion, antisense RNA, tobacco protoplasts, 69
Cell fusion, generative cell, haploid protoplast, *Lillium longiflorum*, nuclear differentiation, pollen, 259
Chilling-resistance *Euglena gracilis*, photosynthesis, fluorescence induction, diuron-resistance, 213
Chloroplast, ribosomal proteins, genes, nuclear genes, 1
Chloroplast DNA, barley, gene expression, NADH dehydrogenase, senescence, 63
Cicer arientinum, autolysis, epicotyls, β-galactosidase, glucosidases, growth, 45
Cicer arietinum, auxin, indoleacetic acid, binding, 151
Coat protein, cymbidium mosaic virus, orchids, virus purification, in vitro translation, 141
Colorin, *Erythrina americana*, purification, lectin, glycoproteins, 133
Cucumber, senescence, DNA degradation, restriction fragment length polymorphism, ethylene, 13
Cucumis melo, repeated sequences, tissue culture, regenerated plants, promiscuous DNA, 81
Culture density, *Picea sitchensis*, Sitka spruce, somatic embryogenesis, suspension culture, plating, 115
Cyamopsis tetragonolobus, guar, purification, anionic, α-galactosidase, germination, 173
Cyanobacteria (*Nostoc*), glucose transport, lichen (*Peltigera*), symbiosis, 283
Cymbidium mosaic virus, orchids, virus purification, in vitro translation, coat protein, 141

Daidzein, isoflavonoids, glyceollin, divalent cations, secretion, soybean roots, 181
Diuron-resistance, *Euglena gracilis*, photosynthesis, fluorescence induction, chilling-resistance 213
Divalent cations, isoflavonoids, glyceollin, daidzein, secretion, soybean roots, 181
DNA degradation, senescence, restriction fragment length polymorphism, cucumber, ethylene, 13

Electroporation, *cat* reporter gene, gene regulation, promoter occlusion, antisense RNA, tobacco protoplasts, 69
Embryogenic suspension, *Agrostis alba*, protoplast culture, amino acids, plant regeneration, 267
Embryo maturation, abscisic acid, alfalfa, *Medicago sativa*, somatic embryogenesis, 93
5-Enolpyruvylshikimate 3-phosphate synthase, tobacco, glyphosate, gene amplification, 53
Enzyme regulation, kinetics, Mg^{2+} effect, phosphofructokinase, 27
Epicotyls, autolysis, *Cicer arientinum*, β-galactosidase, glucosidases, growth, 45
Erythrina americana, colorin, purification, lectin, glycoproteins, 133

Ethylene, senescence, DNA degradation, restriction fragment length polymorphism, cucumber, 13
Ethylene, *Solanum carolinense*, anther culture, pollen androgenesis, calcium, auxin, 109
Euglena gracilis, photosynthesis, fluorescence induction, chilling-resistance diuron-resistance, 213
Explant, soybean tissue culture, organogenesis, plant regeneration, in vitro flowering, acclimatization, 101

Festuca arundinacea, plant regeneration, protoplast, single genotype, agarose bead method, nurse culture, 125
Flavonol glycosides, *Agrobacterium tumefaciens*, transformation of wheat, pollen transfer, 233
Fluorescence induction, *Euglena gracilis*, photosynthesis, chilling-resistance diuron-resistance, 213
Foliar senescence, *Spinacia oleracea*, microbodies, glyoxisomal enzymes, 159
Fructanase, sugar cane, fructans, glycosidase, manganese, post-collection impairment, 193
Fructans, sugar cane, fructanase, glycosidase, manganese, post-collection impairment, 193

α-Galactosidase, guar, purification, *Cyamopsis tetragonolobus*, anionic, germination, 173
β-Galactosidase, autolysis, *Cicer arientinum*, epicotyls, glucosidases, growth, 45
Generative cell, cell fusion, haploid protoplast, *Lillium longiflorum*, nuclear differentiation, pollen, 259
Genes, chloroplast, ribosomal proteins, nuclear genes, 1
Gene amplification, tobacco, glyphosate, 5-enolpyruvylshikimate 3-phosphate synthase, 53
Gene expression, barley, chloroplast DNA, NADH dehydrogenase, senescence, 63
Gene expression, oleosin, oil body protein, oleosin isoforms, seed protein, seed oil, 223
Gene regulation, *cat* reporter gene, electroporation, promoter occlusion, antisense RNA, tobacco protoplasts, 69
Genotypic effect, inflorescence culture, rye, somatic embryogenesis, 253
Germination, guar, purification, *Cyamopsis tetragonolobus*, anionic, α-galactosidase, 173
Glucose transport, cyanobacteria (*Nostoc*), lichen (*Peltigera*), symbiosis, 283
Glucosidases, autolysis, *Cicer arientinum*, epicotyls, β-galactosidase , growth, 45
Glutamine synthetase, root nodules, *Phaseolus vulgaris*, isozymes, symbiotic nitrogen fixation, 199
Glyceollin, isoflavonoids, daidzein, divalent cations, secretion, soybean roots, 181
Glycoproteins, *Erythrina americana*, colorin, purification, lectin, 133
Glycosidase, sugar cane, fructans, fructanase, manganese, post-collection impairment, 193
Glyoxisomal enzymes, *Spinacia oleracea*, foliar senescence, microbodies, 159
Glyphosate, tobacco, 5-enolpyruvylshikimate 3-phosphate synthase, gene amplification, 53
Growth, autolysis, *Cicer arientinum*, epicotyls, β-galactosidase , glucosidases, 45
Guar, purification, *Cyamopsis tetragonolobus*, anionic, α-galactosidase, germination, 173
Guayule, *Parthenium argentatum*, in vitro culture, organogenesis, 275

Haploid protoplast, cell fusion, generative cell, *Lillium longiflorum*, nuclear differentiation, pollen, 259
Hordeum (endosperm), agricultural insect pests, α-amylase inhibitors, specificity (enzyme inhibition), *Triticum* (endosperm), 37
Hydrogen peroxide, catalase, NADPH, potato, *Solanum tuberosum*, 19

Immune response, *Phytophthora*, oxygen radicals, lipid peroxidation, 207
Indoleacetic acid, auxin, binding, *Cicer arietinum*, 151
Inflorescence culture, rye, somatic embryogenesis, genotypic effect, 253
In vitro culture, *Parthenium argentatum*, Guayule, organogenesis, 275
In vitro flowering, soybean tissue culture, explant, organogenesis, plant regeneration, acclimatization, 101
In vitro translation, cymbidium mosaic virus, orchids, virus purification, coat protein, 141
Isoflavonoids, glyceollin, daidzein, divalent cations, secretion, soybean roots, 181
Isozymes, glutamine synthetase, root nodules, *Phaseolus vulgaris*, symbiotic nitrogen fixation, 199

Kinetics, enzyme regulation, Mg^{2+} effect, phosphofructokinase, 27

Lectin, *Erythrina americana*, colorin, purification, glycoproteins, 133
Lichen (*Peltigera*), cyanobacteria (*Nostoc*), glucose transport, symbiosis, 283
Lillium longiflorum, cell fusion, generative cell, haploid protoplast, nuclear differentiation, pollen, 259
Lipids, triterpenols, triterpenediols, triterpenolic acids, triterpene acids, 165
Lipid peroxidation, *Phytophthora*, oxygen radicals, immune response, 207

Manganese, sugar cane, fructans, fructanase, glycosidase, post-collection impairment, 193
Medicago sativa, abscisic acid, alfalfa, embryo maturation, somatic embryogenesis, 93
Mg^{2+} effect, enzyme regulation, kinetics, phosphofructokinase, 27
Microbodies, *Spinacia oleracea*, foliar senescence, glyoxisomal enzymes, 159

NADH dehydrogenase, barley, chloroplast DNA, gene expression, senescence, 63

NADPH, catalase, hydrogen peroxide, potato, *Solanum tuberosum*, 19
Nuclear differentiation, cell fusion, generative cell, haploid protoplast, *Lillium longiflorum*, pollen, 259
Nuclear genes, chloroplast, ribosomal proteins, genes, 1
Nurse culture, *Festuca arundinacea*, plant regeneration, protoplast, single genotype, agarose bead method, 125

Oil body protein, oleosin, gene expression, oleosin isoforms, seed protein, seed oil, 223
Oleosin, oil body protein, gene expression, oleosin isoforms, seed protein, seed oil, 223
Oleosin isoforms, oleosin, oil body protein, gene expression, seed protein, seed oil, 223
Orchids, cymbidium mosaic virus, virus purification, in vitro translation, coat protein, 141
Organogenesis, *Parthenium argentatum*, Guayule, in vitro culture, 275
Organogenesis, soybean tissue culture, explant, plant regeneration, in vitro flowering, acclimatization, 101
Oxygen radicals, *Phytophthora*, lipid peroxidation, immune response, 207

Parthenium argentatum, Guayule, in vitro culture, organogenesis, 275
Phaseolus vulgaris, glutamine synthetase, root nodules, isozymes, symbiotic nitrogen fixation, 199
Phosphofructokinase, enzyme regulation, kinetics, Mg^{2+} effect, 27
Photosynthesis, *Euglena gracilis*, fluorescence induction, chilling-resistance diuron-resistance, 213
Phytophthora, oxygen radicals, lipid peroxidation, immune response, 207
Picea sitchensis, Sitka spruce, somatic embryogenesis, suspension culture, culture density, plating, 115
Plant regeneration, *Agrostis alba*, embryogenic suspension, protoplast culture, amino acids, 267
Plant regeneration, *Festuca arundinacea*, protoplast, single genotype, agarose bead method, nurse culture, 125
Plant regeneration, soybean tissue culture, explant, organogenesis, in vitro flowering, acclimatization, 101
Plating, *Picea sitchensis*, Sitka spruce, somatic embryogenesis, suspension culture, culture density, 115
Pollen, cell fusion, generative cell, haploid protoplast, *Lillium longiflorum*, nuclear differentiation, 259
Pollen androgenesis, *Solanum carolinense*, anther culture, calcium, auxin, ethylene, 109
Pollen transfer, *Agrobacterium tumefaciens*, transformation of wheat, flavonol glycosides, 233
Post-collection impairment, sugar cane, fructans, fructanase, glycosidase, manganese, 193
Potato, catalase, hydrogen peroxide, NADPH, *Solanum tuberosum*, 19
Promiscuous DNA, repeated sequences, tissue culture, *Cucumis melo*, regenerated plants, 81
Promoter occlusion, *cat* reporter gene, electroporation, gene regulation, antisense RNA, tobacco protoplasts, 69
Protoplast, *Festuca arundinacea*, plant regeneration, single genotype, agarose bead method, nurse culture, 125
Protoplast culture, *Agrostis alba*, embryogenic suspension, amino acids, plant regeneration, 267
Purification, *Erythrina americana*, colorin, lectin, glycoproteins, 133
Purification, guar, *Cyamopsis tetragonolobus*, anionic, α-galactosidase, germination, 173

Regenerated plants, repeated sequences, tissue culture, *Cucumis melo*, promiscuous DNA, 81
Repeated sequences, tissue culture, *Cucumis melo*, regenerated plants, promiscuous DNA, 81
Restriction fragment length polymorphism, senescence, DNA degradation, cucumber, ethylene, 13
Ribosomal proteins, chloroplast, genes, nuclear genes, 1
Root nodules, glutamine synthetase, *Phaseolus vulgaris*, isozymes, symbiotic nitrogen fixation, 199
Rye, inflorescence culture, somatic embryogenesis, genotypic effect, 253

Secretion, isoflavonoids, glyceollin, daidzein, divalent cations, soybean roots, 181
Seed oil, oleosin, oil body protein, gene expression, oleosin isoforms, seed protein, 223
Seed protein, oleosin, oil body protein, gene expression, oleosin isoforms, seed oil, 223
Senescence, barley, chloroplast DNA, gene expression, NADH dehydrogenase, 63
Senescence, DNA degradation, restriction fragment length polymorphism, cucumber, ethylene, 13
Single genotype, *Festuca arundinacea*, plant regeneration, protoplast, agarose bead method, nurse culture, 125
Sitka spruce, *Picea sitchensis*, somatic embryogenesis, suspension culture, culture density, plating, 115
Solanum carolinense, anther culture, pollen androgenesis, calcium, auxin, ethylene, 109
Solanum tuberosum, catalase, hydrogen peroxide, NADPH, potato, 19
Somatic embryogenesis, abscisic acid, alfalfa, embryo maturation, *Medicago sativa*, 93
Somatic embryogenesis, inflorescence culture, rye, genotypic effect, 253
Somatic embryogenesis, *Picea sitchensis*, Sitka spruce, suspension culture, culture density, plating, 115
Soybean roots, isoflavonoids, glyceollin, daidzein, divalent cations, secretion, 181
Soybean tissue culture, explant, organogenesis, plant regeneration, in vitro flowering, acclimatization, 101
Specificity (enzyme inhibition), agricultural insect pests, α-amylase inhibitors, *Hordeum* (endosperm), *Triticum* (endosperm), 37
Spinacia oleracea, foliar senescence, microbodies, glyoxisomal enzymes, 159
Sugar cane, fructans, fructanase, glycosidase, manganese, post-collection impairment, 193

Suspension culture, *Picea sitchensis*, Sitka spruce, somatic embryogenesis, culture density, plating, 115
Symbiosis, cyanobacteria (*Nostoc*), glucose transport, lichen (*Peltigera*), 283
Symbiotic nitrogen fixation, glutamine synthetase, root nodules, *Phaseolus vulgaris*, isozymes, 199

Tissue culture, repeated sequences, *Cucumis melo*, regenerated plants, promiscuous DNA, 81
Tobacco, glyphosate, 5-enolpyruvylshikimate 3-phosphate synthase, gene amplification, 53
Tobacco protoplasts, *cat* reporter gene, electroporation, gene regulation, promoter occlusion, antisense RNA, 69
Transformation, *Brassica juncea*, transgenic plants, 245
Transformation of wheat, *Agrobacterium tumefaciens*, pollen transfer, flavonol glycosides, 233
Transgenic plants, *Brassica juncea*, transformation, 245
Triterpenediols, triterpenols, triterpenolic acids, triterpene acids, lipids, 165
Triterpene acids, triterpenols, triterpenediols, triterpenolic acids, lipids, 165
Triterpenolic acids, triterpenols, triterpenediols, triterpene acids, lipids, 165
Triterpenols, triterpenediols, triterpenolic acids, triterpene acids, lipids, 165
Triticum (endosperm), agricultural insect pests, α-amylase inhibitors, *Hordeum* (endosperm), specificity (enzyme inhibition), 37

Virus purification, cymbidium mosaic virus, orchids, in vitro translation, coat protein, 141
